

22-23-24 JUNE | DIGITAL EVENT

April 2021

Forum Teratec 2021 :
The European meeting
digital technology experts
Simulation - HPC / HPDA - IA - Quantum computing
22-23-24 June 2021 - Digital Event

In a still complex health context, the 16th Teratec Forum will experience its 2nd edition in 100% digital format in June. The Teratec Forum has been able to adapt to a new mode of communication and, on the strength of its experience in October 2020, will optimize exchanges between participants, exhibitors, delegates and speakers, notably through a new, more intuitive and interactive platform.

Based on its European leadership in the digital field, France remains the best federating nation to bring together experts in digital technologies: Simulation - HPC (High Performance Computing) / HPDA (High Performance Data Analytics) - IA (Artificial Intelligence) - Quantum computing.

Also, for 3 days, the Teratec Forum will offer Key notes and plenary sessions in the presence of political figures, major industrialists and digital technology leaders as well as technical and application workshops around 6 major themes: quantum computing, storage, cybersecurity, health, autonomous systems and spatial data & environment. At the same time, a virtual exhibition will allow participants to discover the latest innovations from major digital players. Finally, an important part of the Forum will be devoted to the various European research programs in HPC / HPDA and IA technologies.
