TERATEC 2013 Forum
« Innovation by simulation »

The international meeting for Simulation and High Performance Computing
June 25 & 26, Ecole Polytechnique (Palaiseau, Paris area)

TERATEC brings together top international experts in simulation and high performance computing, making it the major event in France and in Europe in this field. It reaffirms the strategic importance of these technologies for developing industrial competitiveness and innovation capacity.

The TERATEC Forum welcomes more than 1000 attendees, highlighting the technological and industrial dynamism of HPC and the essential role that France plays in this field. The participation and the testimony of senior industrial and ICT leaders, the diversity and the high level of the technical workshops, the representativeness of exhibitors and innovation offers displayed, are assets for all responsible concerned by simulation and high-performance computing.

The eigth edition will be taking place on June 25 and 26, in the prestigious location of Ecole Polytechnique.

- **Tuesday, June 25, the plenary sessions** will focus on the technological challenges of Simulation and High Performance Computing and on the diversity of uses of HPC with the participation of representatives from the political, economic and academic worlds, and advanced international industrial users and leading technology suppliers.

- **Wednesday, June 26, workshops** will review the major areas of development, architecture, performance, parallelism, scalability and cover the complete value chain, hardware, software and services.

- **During these two days, there will be an exhibition of around eighty booths of** the major simulation and HPC players. Software manufacturers and producers, integrators and distributors, service providers, academic and laboratory researchers, public and private sector developers, etc. will present their latest innovations.

About TERATEC :

TERATEC is an organization of more than 86 industrial and technology companies, research laboratories, school and universities, created at the initiative of CEA and a few industrialists to establish a European center of expertise in high-performance simulation, with the aim of bring together all industry players and academic providers and users, facilitating access to the most powerful systems, to promote the field and boost its appeal by facilitating job creation and economic development.

Located in the heart of the Arpajon region, near the CEA's very large computing center (TGCC), the TERATEC Campus gathers on one site dedicated to high performance simulation computing with technology companies, industrial research labatories, training institute, services platforms and an incubator and business center.
